INFORMATION REPORT

CD NO.

COUNTRY **East Germany**DATE DISTR. **29 March 1955**SUBJECT **Maritime Radio Equipment Plants of the
Main Administration for Radio and Tele-
communications (HV RFT)**NO. OF PAGES **3**PLACE
ACQUIREDNO. OF ENCLS.
(LISTED BELOW)DATE OF
INFO.SUPPLEMENT TO
REPORT NO. **25X1**

THIS IS UNEVALUATED INFORMATION

25X1

1. On 4 August 1954, a so-called production consultation of maritime radio plants was held at the HV RFT. Heinz Andreas, chief of radio communications and measuring instruments and deputy technical manager of HV RFT, was introduced as chairman of the meeting by Scheffler (fuu), chief of production of HV RFT. The meeting was attended by representatives of FW Koepenick, FW Dabendorf, FW Zittau, FW Koellada and the Rostock Telecommunication Equipment Plant.
2. A preview for the August production revealed that FW Dabendorf could not make any figures, because of unsettled conditions. FW Koepenick expected to fill 80 percent of the August production quota, FW Zittau 90 percent and FW Koellada 115 percent. In August, the entire maritime radio industry could not make a lot of individual parts, especially of those to be produced by the Gotha Plant in "Termas". A request for overtime work by this plant had not been granted, although it had been approved by the Labor Union (FDGB-Funkverband). FW Koepenick and Dabendorf and VEB Askania had already received such permission.
3. It was announced that HV RFT will participate in the Leipzig Fair. On 4 August 1954, FW Zittau was ordered to exhibit electroacoustic products and instruction material. FW Koepenick was to show the cross loop DE unit. The 1955 plan of the Ministry of Interior for administration, procurement and distribution of work orders was allegedly sufficiently completed so that the individual plants could be informed of their work orders.

25X1

2. A preview for the August 1945 production of the Henschel-Heische Plant in Hermsdorf, Germany, was not made, because of the lack of any figures, because the plant had not been granted permission to produce more than 115 percent of the August 1944 production. In August, the entire maritime radio industry suffered from a lack of individual parts, especially of those to be produced by the Henschel Plant in Hermsdorf. A request for overproduction of 115 percent had not been granted, although it had been approved by the Reichsminister of War Production (Reichsminister der Kriegswirtschaft) and the Reichsminister of War Production (Reichsminister der Kriegswirtschaft) (Bundesverstand). FW Koepenick and Dabendorf and [redacted] received such permission.

3. It was announced that HV RFT will participate [redacted] at the Leipzig Fair. On 4 August 1954, FW Zittau was ordered to send [redacted] acoustic products and instruction material. FW Keopeniek was to show the cross loop DF unit. The 1955 plan of the Ministry of Interior for administration, procurement and distribution of work orders was allegedly sufficiently completed so that the individual plants could be informed of their work orders.
